About SNDT Women's University

It is the first women's university in South-East Asia. The university was founded by Maharshi Dr. Dhondo Keshav Karve in 1916 for the noble cause of women's education. The first five women to graduate from this university was in 1921. The university operates from 3 campuses: Churchgate (Headquarters), Juhu and Pune.

The university offers 250 programmes ranging from Undergraduate to Ph.D. as well as Diploma and Post graduate diploma programmes through 15 faculties. It has 39 departments and 174 affiliated colleges.

Workshop Details Story telling

Story telling enhances the interactive art of using words and actions to reveal the elements and images of a story while encouraging the listeners' imagination. Good Story telling expands horizons in various fields.

A.C.T.I.V.E Early Childhood Environment

The program focuses on merging traditional ideas and practices with current research. It facilitates the development of children by helping them grow, survive and succeed.

Rubrics

A Rubric is an authentic assessment tool used to measure student's work. It is a scoring guideline which enhances the quality of direct instruction by providing focus, emphasis and attention to particular details as a model for students.

Technology in Early Child Education

Technology is a medium to support learning and development. Knowledge and use of technology in the preschool classroom can effectively help in strengthening visual attention, better eye-hand co-ordination and develops skills and talents.

Technology in Preschool Arena

Technology is being integrated into the classroom today and as a result of this many concepts, poems and stories are taught through softwares and applications which provide a platform for effective pre school learning.

Whole Language Approach

This Approach teaches children to read by recognizing words as whole pieces of language. This is beneficial to children as they become more independent in reading, writing and learning. It also helps in developing better problem solving strategies.

Learning through Games

Learning through games is not only enjoyed by children but also well retained. It increases the child's attention, language skills, math skills, self regulation, creativity and enhances problem solving skills.

Music and Movement

It is the language which engages and stimulates the brain. Together helps the child in developing higher forms of intelligence, abstract thinking, empathy, mathematics and increases social interaction.

Dramatization

Drama is also referred to as Socio-Dramatic and Pretend Play. It builds confidence, increases concentration, develops language and communication skills, encourages children to co-operate and supports numeracy skills, thus helping them to have a better understanding of the world around them.

Montessori Method

Montessori is a philosophy of education which is based on self directed activity, hands on learning and collaborative play. The teacher facilitates the learning of children by helping them explore through their senses.

Theme based Curriculum Planning

Theme based Curriculum Planning is a vehicle for teaching a range of skills and content by integrating curriculum areas around a topic. It enhances the knowledge appropriate to young children, builds a foundation for literacy, numeracy, critical thinking and promotes a positive attitude.
