# Post Examination Processes

श्रीमती नाथीबाई दामोदर ठाकरसी महिला विद्यापीठ

**SNDT Women's University**

**Computer Centre**

## **Computer Centre of the University**

The University established the Computer Centre in 1985 with U.G.C. assistance for 'O' level Computer System. The U.G.C. assistance ceased on 31-3-1990. State government of Maharashtra permitted the University to create the posts of the staff of the Computer Centre without accepting the financial liability.

In the current scenario, it is a necessity of the time that University functioning is automated and as far as possible it is made independent of the human intervention. Due to automation which is maintained by the internal computer centre of the University, things became simpler and easy to handle over the time. This is the experience, which we have gained by handling examination results processing since 1985. Number of examinations, centres, colleges and students were increased considerably over the time period. Introduction of new course structures like CBCS, have changed for many Programmes. But since the process was computerised, it didn't create much problem while declaring results.

Since 2018, the University has started processing results of college level examinations at the University Computer Centre. The Computer Centre processes result of around 50,000 students twice a year.

During pandemic, computer centre supported various online activities like help centre, conducting online meetings, preparing various examination statistics required by various University and Government Authorities, preparation for online examinations, conducting online examinations, preparation of results as per UGC guidelines etc. Due to automation of various activities the University could provide solutions to its stakeholders in stipulated time.

There are many functions of the Examination Section that can be computerized and integrated. The main contribution of the computer centre has been continuously reducing cost and increasing efficiency. Computer centre is able to process most of the results within 30 days' time limit due to systematic processing and computerization. There is recorded evidence for it from 1985. University also has set up networking amongst its 3 campuses (churchgate, Juhu, Pune) to improve the communication.

As per the UGC guidelines computer Centre has uploaded 24,957 Degree, 1,025 Diploma and 40 Certificate records on NAD/CVL portal for the academic year 2016-17 and 2017-18. On Digilocker portal, computer centre has uploaded 1,08,188 Degree certificates and 3,863 Diploma certificates from academic year 2013-14 to 2020-21. Currently Computer Centre is handling creation of ABCIDs of the students and is in the process of preparing marks data to be uploaded on Digilocker along with ABCID.

Various Examinations related services provided by the computer centre:

- System Requirements Analysis and Design
- Software Development, Maintenance and Processing for
  - Examinations conducted by the University (From Examination registration till Convocation)
  - Enrolment system
  - Registration for Distance Education
  - Examinations conducted by the Distance Education
- System Accounting
- Keeping an account of students
- data-entry, editing and corrections
- Processing of Pre-Examination Data
- Processing of Post-Examination Data
- Provide data of Program/Course wise Meritorious students
- Provide data for Printing of degree certificates
- Provide statistics for Annual Report
- Provide statistics for various Statutory agencies
- Providing data required at the CAP centers
- Transferring data from E-savidha portal and vice versa
- Providing data for OMR/Barcode Scanning process
- Processing results in ERPS system
- Printing ledgers, marksheets and passing certificates
- Maintaining records of printed/discarded marksheets
- Upload students Records on Digilocker Portal
- Regular Backup
- Maintaining stock of computer stationery

#### **Other Activities handled by Computer Centre**

- Payroll system of the University (1993-94 to 2019-20)
  - Payroll System development and maintenance
  - Salary Calculations
  - Various salary report printing
  - Various arrears calculation related to Salary (DA arrears, VI<sup>th</sup> pay arrears etc)
  - Salary Consolidated statements
  - Income Tax Calculation, Form 16 generation and printing etc
  - VI<sup>th</sup> pay Fixation
- Trainings/Workshops
  - University Staff
  - Short term Certificate Courses for senior citizens

➤ **Pre-Post Examination Process:**

**1) Define Event –**

While defining an event, multiple exams can be scheduled in an event. When examinations span over 2 months, the starting month shall be considered as event (e.g. for Mar-Apr Examinations event can be used as 'Mar-2009' event).

**2) DefineSchedule –**

While defining a schedule for a course, consider the dates of various activities. If two or more courses are following same dates, then attaching those in same schedule is better. In such cases schedule name shall be generic. If all courses have separate schedule code inspite of having same dates, then one can define separate schedules for those courses.

**3) Confirm Schedule –**

The confirmation is required before proceeding for examination forms generation.

**4) Exam Fee Configuration –**

Configuration of Exam fee. e.g. practical fee, late fee, exam fee etc.

**5) Exam Form Inward Configuration -**

**6) Publish Schedule –**

The schedule shall be published once all details are checked and confirmed. Once schedule is published, it cannot be edited again and it will be immediately available on portal and student login.

➤ **Center Management**

Center management module deals with organising and managing seating arrangements and conduct of examination at various locations 'Center' is group of geographically proximate colleges identified by name of an important place (city, tahsil, district etc.). Center master creation is one time activity. One can create new centers and move the colleges under it from other centers anytime. If a center no longer exists, then it can be made inactive. The center need not / cannot be deleted since it has some past data associated with it. Normally most of the colleges are used as venues for examinations. A college may or may NOT be a venue for an examination. However a college must be associated with a center (its parent center) even if it is not been used as a venue.

**7) Center Master**

**8) Center-Institute/College Mapping**

**9) Schedule-Center Mapping**

**10) Schedule-Venue Mapping**

**11) Publish Schedule-Center Information**

## ➤ Generation of Examination Forms

- The generation of examination forms can be done with respect to the schedule defined for the given course part/term.
- The forms will be generated based on the admission data for the fresh students and result data for repeater students.

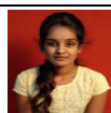

12) Paper Inclusion

13) Exam Form Configuration

14) Generate Exam Form

15) Examination Form PDF Generation

**Examination Result Processing System (ERPS)**

## Examination Result Processing System (ERPS)

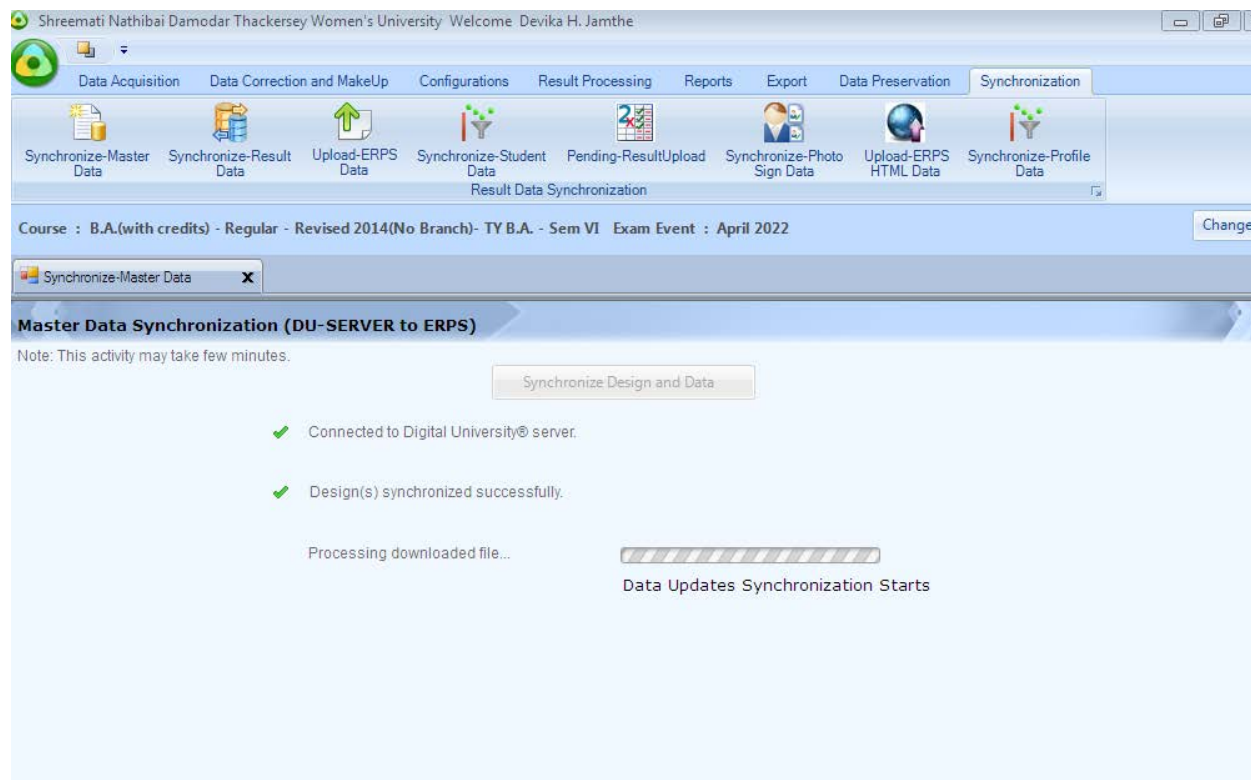

The University has started processing results in Examination Result Processing System (ERPS) (MKCL) from Oct 2018. Every year some programs are migrated from Legacy system to the ERPS system. In 2022-23 all the remaining programs are in process of migration.

The benefits of ERPS system are:

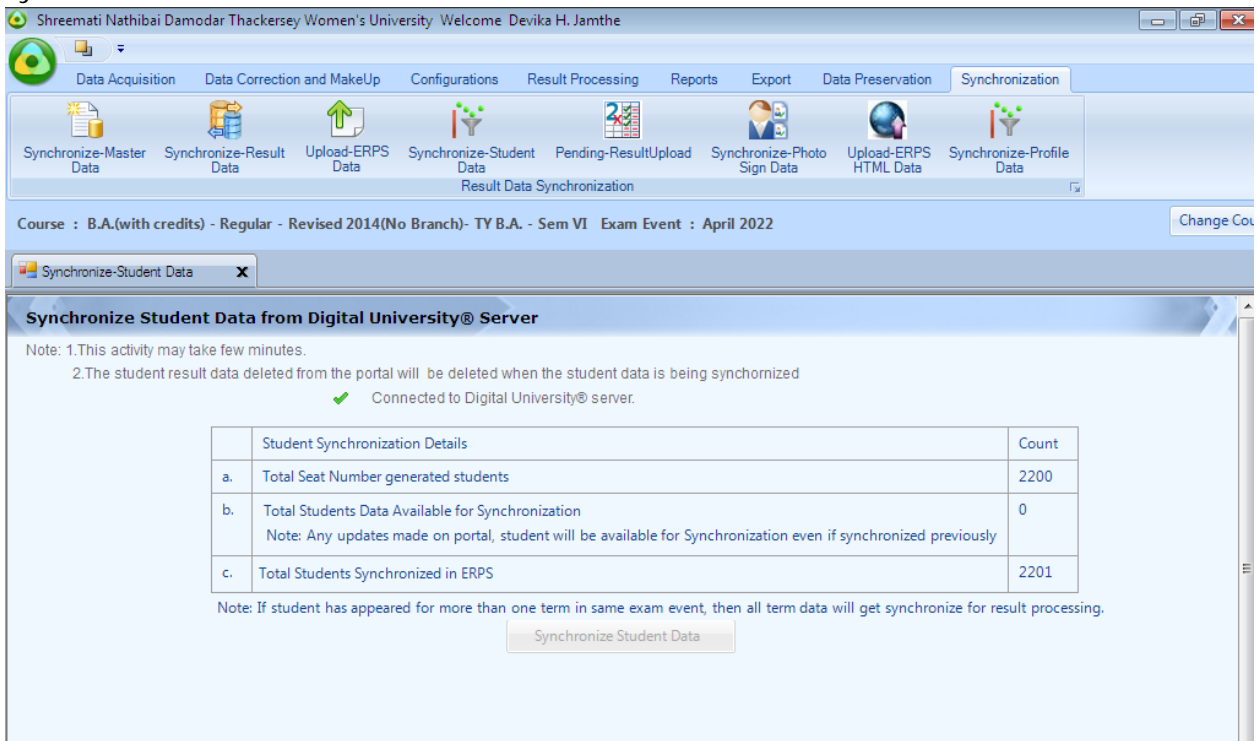

1. It is implemented with Client-Server secured architecture.
2. It has interface with DU portal of the University. Hence all pre-examination data, course structure etc. can be easily synchronized in the ERPS system. This avoids repetition of work.
3. The processed result can be easily published on DU portal
4. Student can see their results in their respective login.
5. Any changes in course structure/pattern can be easily migrated to ERPS.

Following steps are involved in result processing:

- 1) Synchronizing Master Data: The various masters related to program are synchronized.

- 2) Synchronize-Student Data – Student details related to particular event of the examination are synchronized.

Shreemati Nathibai Damodar Thackersey Women's University Welcome Devika H. Jamthe

Configuration for ATKT (Allowed To Keep Terms) Criteria

Select the calculation criteria for ATKT

☒ Definition in terms of percentage of passed heads  
(Example: Minimum 75 % heads shall be passed for obtaining Failed-ATKT status)

☐ Definition in terms of maximum count of failed heads  
(Example: Maximum 3 heads shall be failed for obtaining Failed-ATKT status)

Enter minimum percentage of heads that shall be PASSED by student for obtaining 'Failed-ATKT' **60** %

☒ Use 'Rounding off' for fractions  
☐ Use 'Flooring off' for fractions  
☐ Use 'Ceiling off' for fractions

Please verify the desired output by entering values here  
(These values will not be saved)

Enter sample number of passing heads opted by a student :

XX % of YY passing head :

Rounding of :

**According to above configurations**  
The minimum passing heads that student shall passed for obtaining Failed-ATKT status will be

If student is PASSED in a passing head but remain NOT exempted then consider that head as ☐ Consider as PASSED for ATKT calculation ☒ Consider as FAILED for ATKT calculation

☒ I have verified and confirm that configuration is correct.

**OMR and Barcode Technology on  
Answer Booklets  
(Examination Reforms)**

## **Use of OMR and Barcode Technology**

The University has implemented OMR (Optical Mark Recognition) and Barcode Technology in cover page of answer booklets of University Examinations to be held since October/November 2015. In this solution, the cover page of the Answer Booklet is divided into four OMR sections, each having the unique barcode of the answer booklet. The first section contains OMR sheet for capturing student's personal details like Examination seat number, course code, medium etc. The second section contains OMR sheet to be used by examiners/moderators for entering the individual marks obtained in each answer and finally the total marks obtained by the student in the answer booklet. The second and third sections are used for revaluation and re-evaluation respectively.

Depending upon the vendor's technology one of the following method is used for capturing data and maintaining confidentiality of student's identity:

Method 1: Post examination, the first page of answer booklet is scanned for capturing Examination seat number, course code, medium and image of the first page. Simultaneously the code number is auto printed on each section of the answer booklet, the first section is torn off and preserved separately and answer booklets are ready for assessment.

Method 2: Post examination, the unique key and/or barcode is pasted on every section of the cover page of the booklet. Thereafter the first section of the Answer Booklet is torn off and scanned for capturing Examination seat number, course code, medium. The first section is preserved separately and answer booklets are ready for assessment.

After assessment and moderation control sheets/ answer booklets are scanned to capture marks obtained by the students. The software provides alerts in case of totaling mistakes. These marks are synchronized against the unique code of the answer booklet and with the personal details of students.

## **Main Features of the solution**

1. OMR Sheets are designed as per requirement of the University and can then be directly read with the help of scanner devices thereby eliminating the need for data entry.
2. In this solution, the Cover page of the Answer booklet is divided into four sections, each containing the unique id of the answer booklet encoded in a bar code/code number.
3. First section of the OMR Sheet in the cover page is used for capturing basic information of students like Seat Number, Course Code, and Medium etc. This data can directly be read by the scanners. This can eliminate the need for data entry by university staff and eliminate errors in data entry of students' details as well.

4. Second Section of the OMR sheet in the cover page is used by examiners for entering marks gained in each question and finally the total marks achieved in the answer booklet. The software provides alerts in case of totaling mistakes. This technology can greatly reduce errors in totaling and malpractices at data entry level can be eliminated.
5. Second and Third section of the OMR sheet in the cover page is used for revaluation and re-revaluation of the answer booklet.
6. In post examinations phase, the answer booklets carrying unique barcode are collected from centres and the first section of the answer booklets with personal details of the student is scanned, detached and stored separately. These personal details of the students are stored against the unique barcode/code number on the answer booklet.
7. Following this, the Answer booklets without reliving the identity of the students are sent to examiner/moderator for evaluation.
8. After evaluation, marks are entered in the second section of the cover page in the OMR sheet. The marks of individual answers as well as total marks obtained by the student are entered by the examiner in the OMR sheet and total marks obtained are entered in the control sheet.
9. The marks entered in the OMR sheet/Control sheet are read by the scanners and matched against the personal details of the students appearing for the Examination with help of unique code number.

#### **Salient features**

- Maintains confidentiality of the student.
- Software automatically reads data and provides alerts for totaling errors
- Useful for reducing validation errors
- Synchronizes data against students' personnel details
- Processes results quickly
- Data can be stored for longer period for resolving issues
- The scanned images can be searched easily for resolving discrepancies, re-valuation, verification, photocopy, etc.
